

Gateway™ ATR System

An advanced multi-reflection ATR system for the infrared analysis of solids, liquids, pastes and gels.

The Specac Gateway™ ATR system is a low cost multi-reflection horizontal ATR accessory.

High performance transfer optics and anti-reflection coated ZnSe crystals ensures unrivalled throughput and sampling sensitivity.

The rugged design, simple optical layout and Specac's unique

Benchmark™ base-plate system ensures optimum performance - no matter which instrument make or model you use.

The choice of three basic configurations gives the user the ability to select a complete package that best suits their needs while optional, additional top plates allow sampling flexibility and system expandability.
